

Springboard Children's Supplements: "Fun" and "Healthy" in the Same Package!

Nothing can be more important to a child's success than a healthy mind and body. Springboard Supplements for Growing Bodies are an important part of the growing years. Formulated with the best science and utilizing the finest raw materials, Springboard Supplements for Growing Bodies help keep your youngsters vibrant and strong!

Springboard Supplements were developed with the help of Fred Pescatore, MD, a nationally known expert on children's health. Dr. Pescatore has authored several books, including "Feed Your Kids Well", a nationwide best-seller, and is President of the International and American Association of Clinical Nutritionists.

"Our culture faces a serious challenge. Never before have children experienced so many serious medical conditions so early in life — mostly as a result of learning poor lifestyle choices early. Parents must take no shortcuts in the need for supplements of the highest quality. Springboard supplements exceed that standard."

Fred Pescatore, MD

Experience the Line of Children's Supplements that are as Good to their Bodies as they are to their Taste Buds! Because Efficacy Matters® orthomolecular products.com
