Blood Sugars

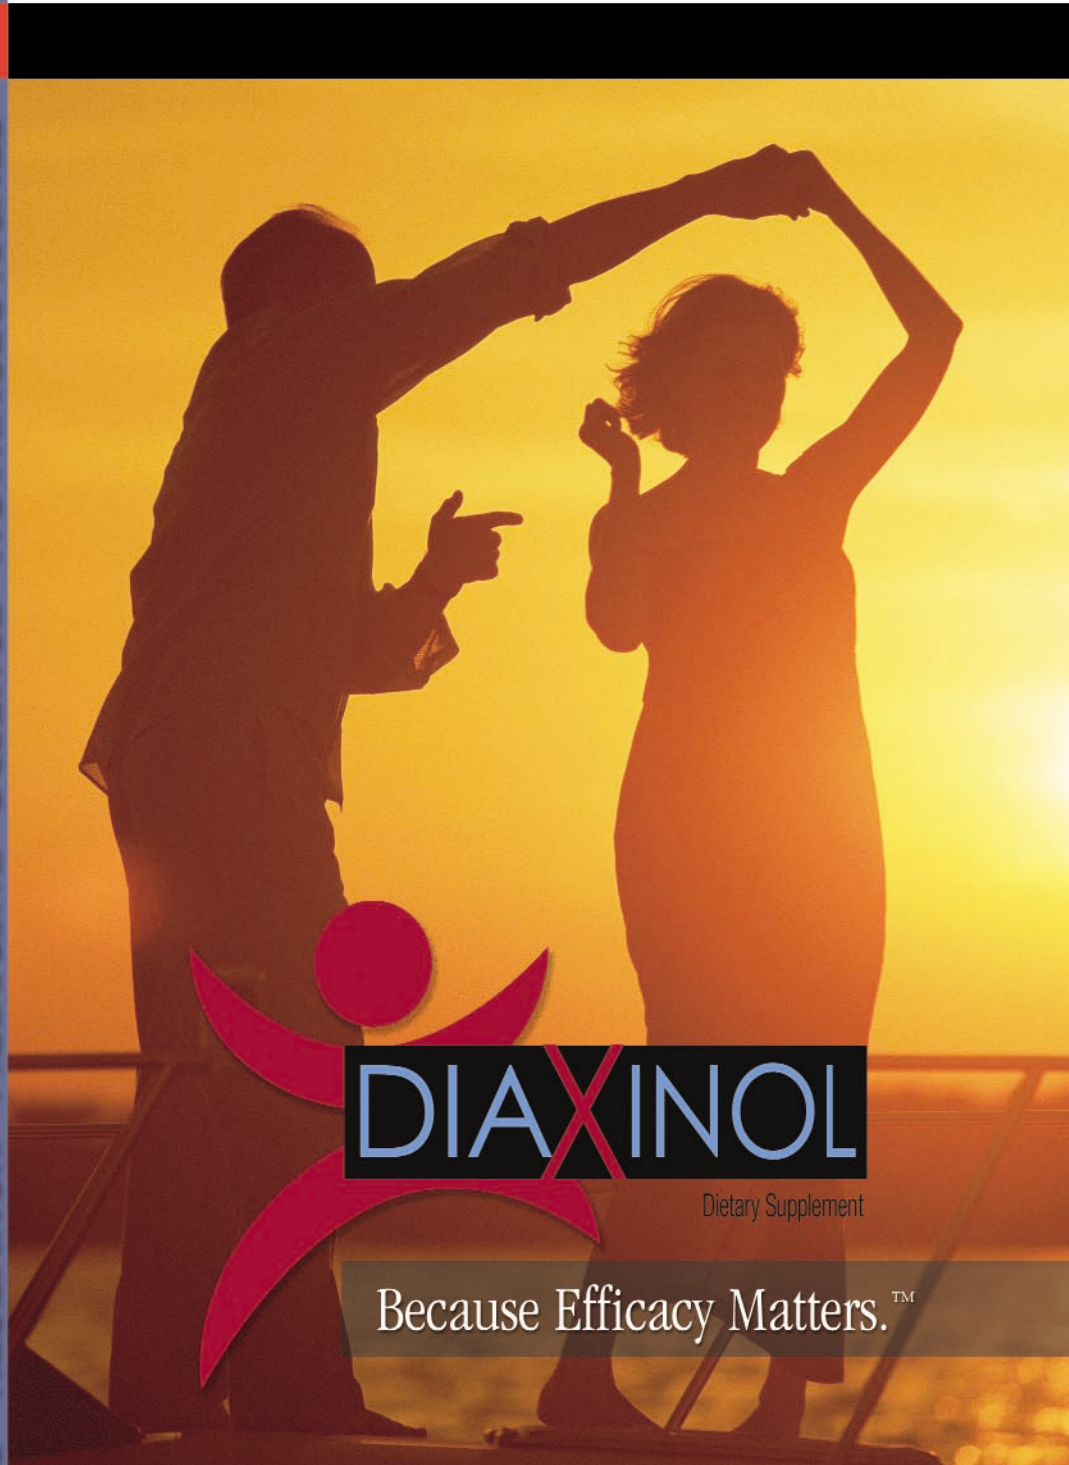

"I need help maintaining my already normal-range blood sugars. Diaxinol lets me take more aggressive control of my future."

Consider the Future.

Maintaining already normal-range blood sugar levels has become one of America's biggest health priorities.

The natural components found in Diaxinol have shown a remarkable success rate for patients striving to maintain already optimal blood sugar levels.

Dietary Supplement

Because Efficacy Matters.™

Dietary Supplement

Consider the Future.

Why These Natural Ingredients?

Ortho Molecular's Diaxinol is a leading edge supplement approach combining the most studied natural ingredients having the best clinical trial effectiveness. We incorporate the safest correct clinical dosages with an aggressive Lipoic Acid content to help maintain long-term health.

A True Combination of the Best Scientific Studies

Many products use Gymnema or Vanadyl Sulfate to maintain blood sugar levels already within the normal range. However, no other product uses correct scientific dosages of those ingredients *plus* an aggressive dose of 300mg Lipoic Acid, which has been shown to benefit target population groups. Used for over 30 years in Europe for maintaining blood sugar levels already within the normal range, these ingredients offer the most well-rounded scientific combination of natural ingredients available.

Support for:

- Maintaining Existing Normal-Range Blood Sugar Levels
- Current Societal Metabolic Trends

The Ortho Molecular Difference:

- Only Ortho Molecular Diaxinol is optimally dosed for 300 mg of active ingredient Lipoic Acid.
- Clinical doses of all active components using the best and most effective ingredient sources available.

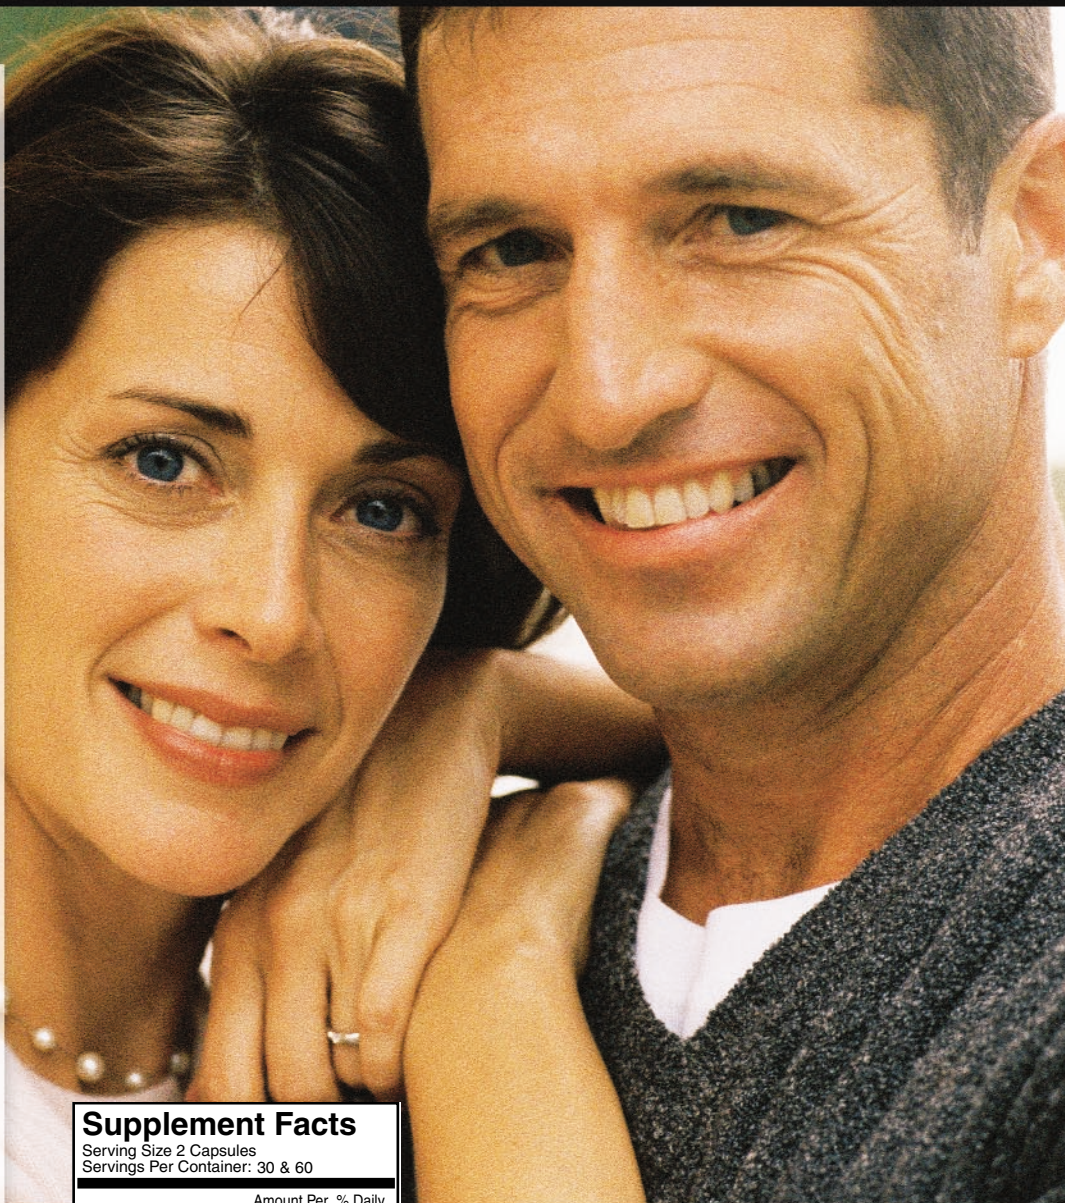

Contraindications, Adverse or Other

Reactions:

As with any supplement, consult your health care professional if pregnant or if taking hypoglycemic products.

Also Recommended:

- Alpha Base
- Fiber Plus
- Lipoic Acid
